Investigator Narrative

Stasiulewicz, Mikoli Augustin

On July 30, 2026 at 1723 hours I received and accepted a request from the Absolute Call Center to contact Grand Rapids Police Department Officer Brittany Bowersock in reference to the death of Mikoli Augustin Stasiulewicz. I spoke to Officer Bowersock by phone and learned the following.

The decedent was a never married/no children 27 year old Caucasian male who lived in a home in Grand Rapids with roommate [redacted] and her boyfriend. He has his own bedroom on the second floor. Roommate [redacted] told police she last saw the decedent at approximately 1500 hours on July 26, 2026. His bedroom door has been closed since then. On July 30, 2026 [redacted] contacted police to do a welfare check on the decedent because there was a foul odor coming from his bedroom, and a large population of flies around his door. Police made entry and found the decedent obviously deceased lying in bed with blankets covering him. Death was pronounced at 1701 hours on July 30, 2026 by AMR medics.

The decedent's medical history included depression, anxiety, ADHA, and possible psychosis. He smoked marijuana and vaped in the past, consumed alcohol, did not use illicit drugs, and spoke of hurting himself but never attempted it. Police found a baggie of blue pills in his hand and another baggie of white pills. Pill identifier shows the blue are Zoloft and the white are Trazodone. [redacted] described the decedent as an "odd guy" who is on a strict "carnivore diet". The decedent was being treated by a physician in Grand Rapids and a functional medicine physician in Portage. The decedent is currently under investigation by the FBI for involvement in an art gallery theft, and his brother told police the decedent may have overdosed on his prescription medications as a result of that investigation. No exit note was identified at the scene.

Moderate decomposition had taken place, and there were no signs of trauma.

Carrier on Call transported the decedent to the morgue at Corewell Health Blodgett. After autopsy, Dr Stephen D Cohle MD determined the manner and cause of death are both pending. The death certificate was prepared electronically and made available to the funeral home.

Summary Addendum: October 08, 2026 at 10:36:42 PM by Thomas Wodarek D-ABMDI

Following completion of autopsy and associated studies, in conjunction with investigation, the cause of death is acute morphine toxicity. The manner of death is accident. For complete autopsy findings and toxicology results, please refer to the autopsy report. A correction to the pending death certificate will be submitted to the State of Michigan to reflect the above cause and manner of death.
