RE: Response to Town of Marana Letter Dated November 4, 2026 – Business License Application for the Marana Detention Facility

Dear Mr. Kalaitzidis:

Thank you for your letter dated November 4, 2026, regarding the business license application for MTC, and your concern that MTC did not provide sufficient information regarding all of the PREA allegations referenced in a news article published in September 2026. While one of the allegations was addressed at length in our previous response, we did not adequately address the allegations involving alleged incidents in August 2022 and September 2023 that may have fallen within the reporting period for MTC's PREA audit conducted in October 2023. Additional information regarding these two allegations is outlined below as requested.

On August 5, 2022, the Marana facility received an allegation of possible sexual misconduct through a third-party phone call. The facility reported the allegation to ADOC the same day in accordance with contractual requirements. ADOC investigated the matter and, on August 23, 2022, determined the allegation to be unsubstantiated due to a lack of evidence.

This allegation should have been included in the audit documentation provided to the auditor for the October 2023 PREA audit because it fell within the twelve-month review period. However, on August 8, 2023, the facility's PREA Compliance Manager passed away unexpectedly and was therefore no longer employed by MTC. The replacement PREA Compliance Manager gathered and submitted all documentation known by them to be available at that time. Unfortunately, this allegation from early August 2022 was mistakenly omitted. While this was an error, there was no intention by MTC to withhold information, mislead the auditor, or undermine the audit process in any way. It was simply an oversight by a new staff member who was assembling the audit documentation.

The second allegation referenced in the article involved a third-party report made through the PREA hotline in late September 2023. PREA hotline reports are received directly by ADOC. ADOC first notified the Marana facility of the allegation on October 2, 2023, and initiated an investigation. The allegation involved claims of sexual harassment, not sexual abuse. On October 6, 2023, ADOC closed the investigation as unfounded, meaning the investigation

found no evidence to support the claim and it was determined the allegation did not meet the standards of a PREA allegation. Accordingly, it was not included in the PREA audit.

In conclusion, of the three allegations identified in the article, only one was mistakenly omitted from the information provided to the auditor. Based on the investigation conducted by ADOC and its findings, we do not believe the inclusion of that allegation would have impacted or changed the outcome of the October 2023 PREA audit. Most importantly, all three allegations were reported appropriately to ADOC in accordance with contractual requirements, and all required procedures were followed to ensure the safety and well-being of the individuals in our care.

Please let us know if you have additional questions.

Sincerely,

Mary M. Calvin
